

# Clockwork Renaissance

Race to Rebuild the Works of Leonardo da Vinci!

From the designer of The Abandons, published in 2019!

1525, Republic of Florence. The Master is dead. You have been invited to one of Leonardo da Vinci's clockwork-inspired laboratories to compete against other artists, to prove yourself capable of following in the departed Master's footsteps.

Players move across the rotating, interlocking gears, picking up an archive plan, then earning money to recruit engineers, gather tools, and buy materials, in order to build the machine on their plan at the Assembly Gear. Once your machine is assembled, you must ride the machine back across the gears to the entrance before the other players.

## Mechanics:

Set Collection  
Board Control  
Resource Management

## Components:

1 Gear Board  
5 Player Boards  
7 Gear Pieces  
10 Player Pawns  
5 Card Stands  
30 Small Cubes  
10 Large Cards  
40 Small Cards  
40 Small Tokens

The moving-gear board features removable gears that turn in relation to the Control Gear. Players can control the board to achieve their goals and interfere with opponents.

10 Archive Plans each provide a unique combo of skills and resources needed to build your machine.

Once complete, you can use your machine's special abilities to help.

Ornithopter  
Paris Manuscript 8

Armored Car  
Popham 1030

Aerial Screw  
Paris Manuscript B

Specialties  
Hydrodynamics  
Aerodynamics  
Tools  
Materials  
Woodwork  
Pipes  
Water  
Saw  
Wood

Vehicle: Once per turn, after moving, player may spend 1 Wood to move their vehicle one additional space.
